

Millionaires go to WAR!

Expect world's workers to fight for them!!!

'President' George Bush, ringleader
of US Military - Industrial complex

A millionaire like his father before him, a boss in the oil industry before taking up his leadership of this terror group.

This group has been responsible for the sanctions against the Iraqi people that killed 5,000 children every month (according to UN figures).

They are known to possess huge quantities of chemical, biological and nuclear weapons.

Working with similar groups internationally they are imposing capitalist globalisation on the world's working class. At their 2001 meeting in Genoa they murdered one protester and hospitalised hundreds. This is part of a growing pattern of terror; they also shot 3 in Goteborg.

Osama Bin Laden, ringleader of
the al Qa'eda group

A millionaire like his father before him, a boss in the oil-financed construction industry before taking up his leadership of this terror group.

This group is almost certainly responsible for the deaths of 3,500 people in the September 11th attacks on the USA.

This group is thought to have very limited access to biological weapons and has tried to get access to chemical and nuclear weapons.

Working with similar groups internationally they plan to impose religious rule on the working class living in the Muslim world. Working with the Taliban in Afghanistan they denied education to women and murdered those who opposed their rule.
